

Long Term Player Development Stages 4-7

Club Goalkeeping Development Manual

Wellness to World Cup Long Term Player Development

As coaches, teachers, administrators and parents, we need to look at the big picture for Canadian soccer. We want to develop “star” players who can play on the big stage, but we also want to encourage recreational players who can benefit from the health aspects of soccer and give back to the game for years to come as coaches, officials, and administrators.

Long-Term Player Development (LTPD) is the Canadian Soccer Association’s pathway to success on both fronts. LTPD is a player-centred approach that provides guidelines for correct training, competition, and recovery based on scientific principles of human development and athlete training, combined with the knowledge of expert coaches.

Player-centred means we respect the developmental needs of our players first and foremost. We ensure that our young players have fun while they learn so they want to continue playing. It also means we provide challenging opportunities for special talents so they can develop their abilities and pursue excellence. All of these needs are addressed in the seven stages of LTPD.

LTPD is designed to promote lifelong wellness for all soccer participants and optimal performances for elite players, particular in growth and development years when performances can become instable and lead to drop out.

LTPD encourages players to enjoy the game and improve their performances through:

- *Logical and integrated training and practice programs.*
- *Application of scientific principals in growth, development and maturation.*
- *Provision of an optimal structure for competition at all stages of LTPD*

LTPD and Goalkeeping

STAGE 4 'Training to Train' U11-U15 Female/U12-U16 Male

Specialization phase, but should still play field. Refine ball handling at all heights plus shots and with crosses. Catch? Deflect? Top hand situations. Develop two-handed/one-handed punching of crossed balls. Refine throwing and diving techniques, footwork, goal kicks and punts. Develop drop kicks and moving back passes. Introduce side winder, fly kick and tackling.

STAGE 5: Training to Compete U15-U19 Female/U16-U20 Male

Most players including keepers now in specialized positions. Continue refining and perfecting all techniques, including ball handling, diving, footwork, deflecting and punching, diving, and kicking. Greater emphasis on the leadership role regarding communication/positioning/directing players, particularly defenders, in tactical requirements

STAGE 6: Training to Win U18+ Female

Goalkeepers are entirely specialists. Most skills are in a maintenance or remedial mode and "perfecting" mode. The leadership/tactical role of the Sweeper/Keeper is paramount. The interaction between GKs and field players is critical to the success of the team. These should be steadily tested/refined in training and game situations with the highest level of competition and pressure.

STAGE 7: Active for Life Any age Female and Male

Whoever is willing to play in goal is still working on their skills – dreaming of being called up to the big time!

Introduction

The soccer goalkeeper is one of the most important players on the field - they are the last line of defense and the first line of attack. To play the position well requires special skills and training.

Too many coaches, though, soccer goalkeeping techniques and tactics are a mystery. This is especially true at younger age levels, where often coaches have not played much soccer at all,

and much less played keeper. Even experienced field players and coaches may not have much experience with goalkeeping.

This manual is designed to help soccer coaches coach their goalkeepers. It outlines and demonstrates basic soccer goalkeeping techniques and tactics.

To produce goalkeepers for the next level we must prioritize and work on the following:

Handling: Ability to hold on to the ball.

Diving: Power, Technique and shape.

Feet Skills: Required to have feet skills as much as any other player on the field.

Crossing: High-low and inswing-outswing; ability to control the area.

Throwing: Decision making, accuracy, distance.

Tactics: Starting positions, set pieces, organization and communication

Even though the goalkeeper must, whenever possible, be given individual training at the hands of a specialist coach, he/she must also take part in training sessions with the whole team, therefore allowing them to be confronted with real match situations.

Role of the Goalkeeper Coach

The goalkeeper coach has to work together with the head coach to enhance the quality of coaching overall, and to assist with the preparation of the goalkeeper. This working relationship might encompass the following aspects:

- The Goalkeeping coaches vision and understanding of the goalkeepers role;
- The role of the goalkeeper in the team's playing system;
- The choice of targets/objectives for training;
- The planning of targets/objectives for training;
- Specific training with the goalkeepers;
- Coaching the whole team (simulated match situations);
- Mental preparation for the goalkeeper;
- Selection of the goalkeeper for the match;
- Post-match analysis: assessing the goalkeepers performance;
- Scouting for goalkeeper talent.

The goalkeeper coach also forms an integral part of the coaching staff as a whole.

****It is recommended that the Club or team GK coach obtains BC Soccer Goalkeeper Diploma. For more information please visit www.bcsoccer.net.***

Program Creation and Execution

Planning the goalkeeper's general preparation is a complicated process. Drawing up the preparation plan depends on certain factors namely:

- Specific nature of the position of goalkeeper,
- Adapting to team training,
- The limited time available,
- A lack of qualified goalkeeper coaches.

Planning training for goalkeepers clearly involved adaptation.

This is why we need to analyse the issue in greater depth and take into consideration external factors which exist at all levels. Methods, tools and advice can be put forward to improve goalkeepers' day to day work. We need to ask ourselves the questions: WHO? WHEN? And WHAT? is done in goalkeeper training?

Stage 4-7

Teams with 1 or 2 training sessions a week

Who?

- Goalkeeper Coach
- Team Coach

When?

- GK Specific Training Sessions
- Before/after/during training with team.

Example of a Stage 4-7 GK Weekly Program for teams training one or twice weekly

Weekly Program Stage 4-7 (1-2 sessions Weekly)						
Monday	Tuesday	Wednesday	Thursday	Friday	Saturday	Sunday
Rest	Before/After or During Team Session	GK Specific session with GK Coach	Rest	Before/After or During Team Session	Rest	Match Day

What?

- Players must adapt to eleven a side football on a full-sized pitch (aerial balls/goalkeepers place in formation)
- Potential must be carefully assessed noting quality and faults to better focus specific training
- Respecting the different stages of development, but work can be down progressively on the four pillars of development. (Technical, Physical, Tactical, Mental)

It may be better to work in short cycles where technical qualities can be associated with physical qualities:

- aerial Balls, distribution and jumping,
- 1 on 1 challenges, reflex saves and speed,
- Standing saves, diving and coordination.

Stage 4-7

Teams with 2 or more training sessions a week

Who?

- Goalkeeper Coach
- Team Coach

When?

- GK Specific Training Sessions
- Before/after/during training with team

Example of a Stage 4-7 GK Weekly Program for teams training more than twice weekly

Weekly Program Stage 4-7 (more than 2 sessions Weekly)						
Monday	Tuesday	Wednesday	Thursday	Friday	Saturday	Sunday
Rest	Before/After During Team Session	GK Specific Session with GK Coach	Before/After During Team Session	Before/After During Team Session	Rest	Match Day

What?

- Players must adapt to eleven a side football on a full-sized pitch (aerial balls/goalkeepers place in formation)
- Potential must be carefully assessed noting quality and faults to better focus specific training

- Respecting the different stages of development, but work can be done progressively on the four pillars of development. (Technical, Physical, Tactical, Mental)

It may be better to work in short cycles where technical qualities can be associated with physical qualities:

- aerial Balls, distribution and jumping,
- 1 on 1 challenges, reflex saves and speed,
- Standing saves, diving and coordination.

Technical Preparation: Weekly Program and the Training Unit

The time allocated to individual in the group session can be used to make progress in different technical areas. The choice of exercises and the number of repetitions depends on the objective but also on the content of the team session.

Example: if during the session there is 20 minutes of specific GK work before moving on to 1v1 challenges with the players, it is not a good idea to work on high balls. A good preparation for challenges means the goalkeeper can make the most of the session with the team. Daily training with the team naturally enhances the goalkeepers' technical qualities:

- Shooting session; making saves with or without diving
- Small sided games; reflex saves, 1v1's
- Possession Drills; playing the ball with the feet.

Physical Preparation: Weekly Program and the Training Unit

Some coaches have a standard week with certain days that focus on physical qualities, and they may follow this pattern for several months. Other coaches have a specific objective for the development of a physical quality for each weekly program.

Tactical Preparation: Weekly Program and the Training Unit

A goalkeeper's tactical preparation takes two forms:

- Group training with the team
- Individual
 - Preparation linked to the players own game on the field,
 - Adaptation to the next opponents strengths

Any problems arising during match play must be addressed the following week. These can even be watched on video then recreated in training.

Mental Preparation: Weekly Program and the Training Unit

Mental Work is carried out in two portions if possible:

- Professional work with sports psychologist (if club has one)
- Practical work with the goalkeeper coach, consisting of observation, discussion, and reactions to goalkeeping problems.

Goalkeeper Curriculum

How to Use the Matrix Information

Throughout this document, the matrix tables provide guidance on highlighted with a black box. You can review the skill set for each LTPD stage by reading the table vertically beneath the heading for each LTPD stage. By reading the tables as a series of vertical columns, you can see:

1. The abilities expected for players entering each stage
2. The abilities to be trained during each stage
3. The abilities expected for players exiting each stage

After each highlighted skill you will find a series of exercises that can be used to help develop the highlighted skill.

The Learning Continuum

The tables (matrixes) and notes in this document describe a sequential process for coaching soccer skills that includes the Introduction, Development, Refinement, Perfecting, and Maintenance of those skills over specific timelines. Coaches and administrators need to incorporate this "learning continuum" into the design of their soccer training programs as the recommended sequences reflect the natural progression of learning, and the matrix tables identify the optimal training ages for each stage and skill.

The five stages of the learning continuum are dictated by player developmental age, not chronological age. In the ideal coaching scenario, players will begin learning and playing soccer during pre-adolescence and coaches will thereby be able to apply the enclosed coaching, monitoring, and testing guidelines according to the "optimal" training timeline for producing long-term player excellence.

In some cases, some players will begin to learn and train in soccer at a much later developmental age (e.g. post-adolescence). In these instances, coaches must be prepared to customize portions of their training programs to accommodate these latecomers.

Throughout the learning continuum, coaches should understand that the learning and training of these skills and capacities is an integrated process, where techniques and tactics are learned and developed in combination with each other. For the sake of simplicity and clarity, this document presents skills and tactics separately in a “matrix” format, but this should not be construed to mean that different training capacities and elements of game knowledge are intended to be learned in isolation from one another. Words and tables do not capture the integrated nature of the game – in this sense; the matrixes are a “best effort” to highlight the components required in an integrated training program.

1. Skill Introduction

The purpose of skill Introduction is to ensure that players correctly understand the fundamental movements needed to execute a particular skill; development and mastery of that skill will follow in later stages of the learning continuum. Under ideal circumstances where soccer learning and training begins with pre-adolescent youth, different soccer skills are introduced to players at different developmental ages according to a sequential plan. That is, fundamental skills such as kicking and dribbling that form the basic building blocks of soccer will be introduced first, followed by progressively more sophisticated skills that represent the combining or refining of the fundamental skills, such as shooting or passing while dribbling. More sophisticated skills generally require greater subtlety of movement and decision making, so physiological and cognitive development play a large role in determining when they are introduced.

2. Skill Development

After players have been introduced to a skill and clearly understand the elements of its correct execution, they must be engaged in repeated practice of the skill so its basic execution becomes reliable. Many hours of formal training will be required, along with opportunities to apply the skill in practices and competitive settings. Qualified coaches must lead technical sessions so players can receive appropriate feedback and correction of the skill. Skills are then incorporated into game situations, forging the link between “theory and practice” (e.g. controlling a ball out of the air and dribbling with a change of direction).

3. Skill Refinement

Following basic development of each skill, players refine their execution of the skill by combining it with other skills and tactics under conditions of game pressure and pace. Players will also adapt the skill to their own unique physiology. For example, some soccer players may be able to dribble quickly and rely less on control or “finesse” as they outrun opponents based on their superior speed. Meanwhile, some slower players may come to rely to a much larger degree on finer ball handling skills or deceptions as they dribble, frequently executing such refinements as “nutmegs” and step-overs in their dribbling to gain advantage on a quicker opponent. Both player types may possess the same variety of dribbling skills, but they will have adapted them differently to suit differences in stature, speed, stamina, strength, and suppleness. As with all stages of skill development, many hours of practice are required in a

variety of training and competitive settings to refine skills. The significant difference is that players refine their skills under increasing pressure as the speed of the game increases.

4. Skill Perfecting

Players begin perfecting skills once they have completely adapted the skills to suit their particular physiology and they have reached their highest level of competition. Now begins the process of improving the most subtle aspects of their skills – such as speed, suppleness, and power – under the greatest conditions of pressure and performance. Players need to train and apply their skill sets regularly at the greatest level of competitive difficulty in order to challenge their skills at their optimal limits. Also note: improvements in performance may be partially contingent on training elements that are not visible on the soccer field, such as diet and nutritional programming, weight training, and suppleness and flexibility regimens.

5. Skill Maintenance

When playing careers shift from high performance competition to competitive recreational soccer, players no longer seek to refine and perfect new soccer skills. However, it is beneficial that they maintain their existing skills so they can remain active in the sport in a variety of playing, coaching, and officiating roles.

Goalkeeping

Goalkeeping represents a specialized array of skill sets that include abilities in ball handling (i.e. using the hands to catch, punch, or deflect the ball), diving, throwing, receiving, kicking, foot movement, and agility.

Handling

Ball Handling describes the goalkeepers ability to use their hands effectively to catch, parry and punch the ball from a number of angles and in a variety of positions

Ages	12	13	14	15	16	17	18	19+	Any Age
Males	Training to Train				Training to Compete			T2W	A4L
Females	Training to Train			Training to Compete			Train to Win		A4L
Handling									
Ground	Refining			Perfect					Maint.
Waist	Refining			Perfect					Maint.
Chest	Refining			Perfect					Maint.
Head Height	Develop	Refining			Perfect				Maint.
Above Height	Develop		Refining			Perfect			Maint.
Deflecting	Develop				Refining			Perfect	Maint.
Punching	Develop				Refining			Perfect	Maint.

Diving

Diving normally occurs when a goalkeeper is unable to safely collect a ball while staying on their feet. Usually, but not always, it is when the ball, either from a shot or a dribble, is passing outside of the vertical position of the body.

Ages	12	13	14	15	16	17	18	19+	Any Age
Males	Training to Train				Training to Compete			T2W	A4L
Females	Training to Train			Training to Compete			Train to Win		A4L
Diving									
Collaspe	Refining			Perfect					Maint.

Forward Dive	Intro	Develop			Refining			Perfect	Maint.
High Dive	Intro	Develop			Refining			Perfect	Maint.
Wrong Hand	Intro			Develop			Refining	Perfect	Maint.

Feet Skills

In addition to hand skills, goalkeepers are required to have feet skills as much as any other player on the field. Feet skills include everything from the ability to adjust feet positioning to passing, receiving, kicking and tackling.

Ages	12	13	14	15	16	17	18	19+	Any Age
Males	Training to Train				Training to Compete			T2W	A4L
Females	Training to Train			Training to Compete			Train to Win		A4L

EXAMPLE EXCERISES FOR ALL SKILLS CAN BE FOUND AT END OF DOCUMENT

Communication on the pitch

One of the goalkeeper's roles on the pitch is to supervise his team-mates, taking advantage of his position facing play. The goalkeeper can anticipate situations and react quickly. The goalkeeper has two methods of communication on the pitch to fulfil this role: calling and gesturing.

Verbal communication:

The goalkeeper reacts verbally in:

Directing team-mates during play

Examples:

- indicating unmarked opponents
- Providing team-mates with information when involved in 1-on-1 situations: "TIME!", "MAN ON!", "CLEAR IT!" "MAN TO THE RIGHT!"
- Communicating to team-mates for back passes: "TO ME!"
- Making sure that the game plan is respected
- Calling when he comes for the ball: "MINE", "LEAVE IT!"

Organising the defence in dead-ball situations

Examples:

- Directing and positioning the defence before the ball is struck
- The goalkeeper must be fully aware of each player's role
- Calling when he comes for the ball: "MINE", "LEAVE IT!"
- If the goalkeeper does not come out, he still directs his Team-mates: "CLEAR IT!", "AWAY!"

Warning his team-mates when he is going to intervene,

Examples:

- Calling when he comes for the ball: "MINE", "LEAVE IT!"

Every verbal intervention that the goalkeeper makes should be short, precise and forceful. Communication on the pitch should flow in both directions. Outfield players should also warn their goalkeeper of the presence of an opponent as he intervenes.

Communication by gesture

In some situations (if there is a lot of noise in the stadium), shouts may not be heard and gestures have to be used:

- Dead-ball situation – positioning of the wall
- Back pass – the goalkeeper indicates where he wants to receive the ball
- Getting the defensive line back up the pitch
- Using the whole width of the pitch

- Changing the rhythm of play.

Remember!

- If the goalkeeper shouts that he is coming out, he must not collide with a team-mate.
- He can alert the player to whom he will distribute the ball.

The Goalkeeper and the Match

In order to examine the goalkeeper and the match, we must identify the goalkeeper's place, role and position in everything relating to the match:

- Preparation for the match,
- The warm-up before the match,
- Observation and evaluation of the match,
- Recovery after the match.

Match preparation

Two types of match preparation apply (to all age and sporting performance levels):

- group
- individual

The goalkeeper is an integral part of the team but also has the specific individual considerations of his position. The number of parameters influencing the goalkeeper's match preparation increases as the importance of the match increases (amateurs/professionals, children/adults).

Group match preparation includes:

- analysis and evaluation of the previous match; this also represents the initial preparation for the subsequent match
- observation of the opponents
- video
- hotel stay or meal before the match
- pre-match talk

Individual match preparation:

- This form of preparation is highly personal as each goalkeeper is different, with his own habits, rituals, beliefs, etc.
- a good knowledge of the goalkeeper's personality allows the coach to better assist him in his preparation
- observation of the opponents and analysis of their qualities makes the goalkeeper's task on the pitch easier
- Some goalkeepers compile their own statistics on other teams' attackers (penalties, free kicks, etc.).

In practical terms, it can be said that the goalkeeper's match preparation takes place both:

On the pitch:

- Group and individual training (during the week)
- Warm-up before the match

Off the pitch:

- analysis of the previous match
- Mental preparation (group and individual sessions, relaxation, etc.)
- the day before and the day of the match (group obligations and individual habits)
- In the changing room before the match (changing, massage, focus, suppleness exercises, stretching, last pieces of advice, etc.)

Warm-up before the match

The aim of the warm-up is, on the one hand, for the goalkeeper to prepare his body for the match (injury prevention), and on the other hand to quickly review technical manoeuvres that have already been acquired. The goalkeeper's warm-up before the match is, above all, a kind of psychological preparation for the match carried out directly on the pitch.

Catching a few balls and being complimented by the coach and confidently dealing with a few crosses reassures the goalkeeper. Anything that the goalkeeper has not yet learned, he will certainly not acquire during these exercises. When the coach observes a problem, he must react in a very sensitive way, taking into account the goalkeeper's character (calm him down, encourage, say nothing, raise his voice, etc.).

How to warm up

It is important for young goalkeepers to learn how to be independent when warming up. This may provide the answer to the two main questions which arise:

What should be done during the warm-up?

The warm-up must be simple and useful and revise the basic manoeuvres:

- catching the ball (10-12 repetitions)
- diving practice (on ground and medium height 3 or 4 dives on each side)
- catching an aerial ball thrown in (in 11-a-side matches, crosses should be kicked in, 4 or 5 on each side)
- some medium-distance shots
- Playing the ball with feet (short passing and various clearances)

The exercises conducted should not be excessive and take the goalkeeper's age into account.

Who should do the warm-up with the goalkeeper?

For younger children, the coach should initially conduct the warm-up with the goalkeeper. However, when the goalkeeper knows the warm-up procedures, he can be assisted by another goalkeeper, outfield player, assistant coach, etc.

The warm-up for older goalkeepers can introduce suitable elements to give the goalkeeper confidence. If you watch a top-level goalkeeper before a match, you'll notice that the warm-up is a very individual, personalised affair. The goalkeeping coach is there simply to throw and kick the ball in, give some last-minute instructions and answer any questions that the goalkeeper may have. This is a good approach because it respects the goalkeeper's personality and obliges him to take responsibility for his performance right from the warm-up.

Observation, analysis and evaluation of the match

There is no universally-used form for observations of the goalkeeper's activities during a match. Each coach draws up his own form, adapted to what he wants to concentrate on:

- *Observation of a specific activity:*
 - goalkeeper's movements,
 - playing the ball with feet,
 - a specific save.

- *Analysis of all the match situations in which the goalkeeper is in contact with the ball:*
 - this conveys an overall image of the goalkeeper during the match
 - it provides sufficient information to determine any faults in the goalkeeper's play
 - we can determine in which game situations goals are most frequently scored (also an interesting statistic for the head coach regarding the play of the team as a whole)
 - The information obtained can be used in the preparation of a new cycle and indicates the direction in which work should be carried out

Observation is also essential in youth football at higher levels (from U15, 11-a-side on a full-sized pitch). But there remains the issue of who should carry out these observations in youth football. Even if the club has a goalkeeping coach, this coach cannot be expected to attend all matches of all categories. The mission could be carried out by the second goalkeeper, who would be obliged to closely monitor and analyse important match situations, which could also be a useful exercise for him. Comprehensive observations are not useful for younger players. The performance of teams of players of younger ages varies considerably and sometimes the goalkeeper hardly touches the ball.

Observation and analysis are directly related to the evaluation of the goalkeeper's individual performance. We can review the match collectively with all the goalkeepers or just with the

goalkeeper concerned. It is also possible to combine both these methods, especially with younger players. Technical resources have developed and evaluations can now be carried out with the aid of video. Starting on the screen and then following up on the pitch, we can review problematic situations and demonstrate the most suitable solutions. There are now plenty of televised matches that can be used to provide additional examples.

Recovery after the match

Recovery procedures (warm-down, massage, bath, etc.) reflect the head coach's preferences. Recovery sessions can be scheduled after the match or on the following day. Some coaches do not schedule any recovery sessions and give the players time off. Taking into account the specific nature of his position, the goalkeeper may be tired after the match, particularly mentally. This does not require a special recovery procedure, but rather is an organisational consideration for each goalkeeper (habits).

The goalkeeper who played the match can:

- join in with the programme followed by the other players (cool-down)
- carry out a strength-building session
- carry out individual training on the pitch

The second-choice goalkeeper can:

- join in with the other substitutes' programme,
- carry out a specific additional training session.

Handling Exercises-

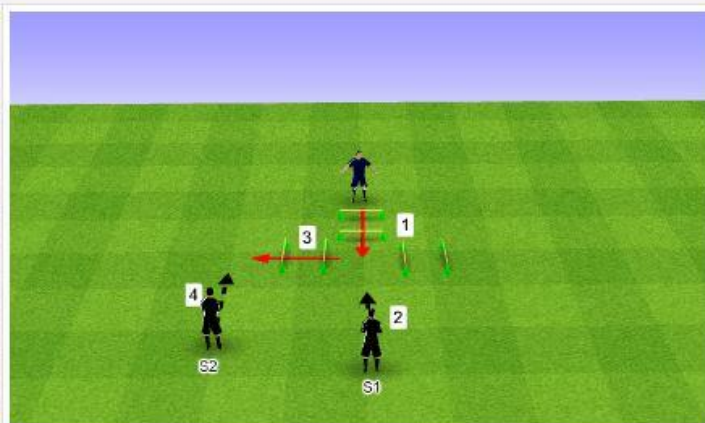

Warm Up

- 1- GK jogs to Gates
- 2- Footwork through Gates (Vary the FW)
- 3- GK gets set in small goal receives from Coach (Vary Service Passing/Ground/Volleys)
- 4- Footwork through second set of Gates (Vary the FW)
- 5- GK gets set in small goal receives from GK (Vary Service Passing/Ground/Volleys)
- 6- Next GK goes

Footwork/Handling 1

5 Poles laid flat on the field (need two servers)

- 1- GK to receive a ball from S1 (vary serves pass/ground/volley)
- 2- Lateral movement over the poles
- 3- GK to receive a ball from S2 (vary serves pass/ground/volley)
- 4- Lateral movement over the poles (Repeat for 8 reps)

Movement/Handling 1

- 1- Movement over poles
- 2- GK Set For Volley into Hands by S1
- 3- Lateral Movement over poles
- 4- Volley from S2

Make sure to work both sides of Lateral Movement (Step 3)

Handling Exercises-

Handling

Set up two cones 6 yards apart with one cone mid way two yards of the line to make diagonal.

1. GK use proper footwork to get out and around the cones.
2. Set for a serve from S1

Serves:

Passing/Ground Balls/Foward Scoops/ Mid Height/Head Height

*Make sure to work both ways of footwork

Handling

Set up same as above.

- 1- GK starts shuffling backwards to the back cone,
- 2- Sprints from back cone to front cone.
- 3- Set for a serve from S1

Serves:

Passing/Ground Balls/Foward Scoops/ Mid Height/Head Height

*Make sure to work both ways of footwork

Diving Exercises-

Diving

Set Up- 4-5 Hurdles a yard apart

- 1- GK to use lateral footwork to get over the hurdles
 - 2- Serve from S1 for both ground and mid height dives
- *Make sure to work both sides

Diving

Set Up 3 cones 4 yards apart.

- 1- GK Starts on one end of the cones, shuffles across to the other end.
- 2- From there will shuffle across to the middle cone.
- 3- Once GK touches middle cone with hand, S1 will serve a ball for a diving save (Serves both ground and mid height dives)

*Make sure to work both sides

Diving

Set up- 4/5 hurdles set up a yard apart.

- 1- GK two foot hops over hurdles.
- 2- Uses quick footwork to get back across.
- 3- S1 serves a dive for the GK (serves both ground and mid height dives)

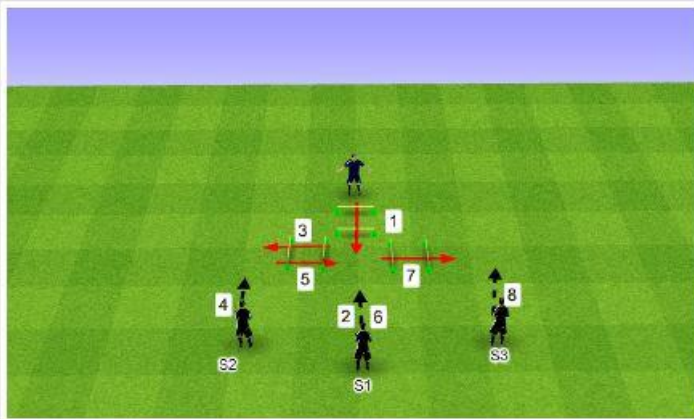

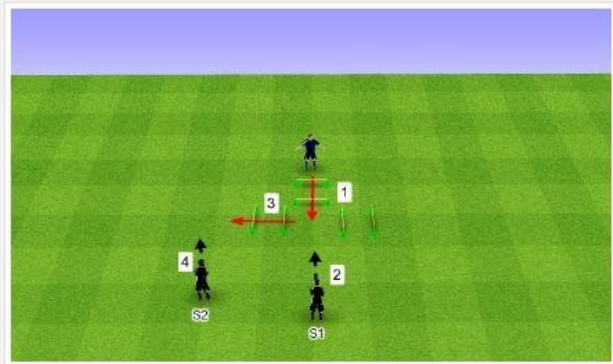

*Make sure to work both sides

Diving Exercises-

Movement/Diving

- 1- Movement over poles
 - 2- GK Set For Volley into Hands by S1
 - 3- Lateral Movement over poles
 - 4- Dive from S2 (ground and air dives)
- Make sure to work both sides of Lateral Movement (Step 3)

Movement/Handling/Diving

- 1- Movement over poles
 - 2- GK Set For Volley into Hands by S1
 - 3- Lateral Movement over poles
 - 4- Dive from S2 (ground and air dives)
 - 5- Lateral movement Back over poles
 - 6- GK Set For Volley into Hands by S1
 - 7- Lateral Movement over poles
 - 8- Dive from S3 (ground and air dives)
- Make sure to work both sides of Lateral Movement (Step 3)

Feet Skills Exercises-

Feet Skills 1

- GK's working in three's
- One GK start in front of cones.
- GKs will move laterally to receive different service from the servers.
- Serves- passing/thigh control/chest control/headers.
- 10-12 reps of each

Feet Skills 2

- Defender passes the ball back to the Goalkeeper, who takes a touch to switch the play to the other side.
- Service- passing on ground/bouncing balls/high balls.
- Make sure to receive passes from both sides of the field.

Progression-

adding pressure on the Goalkeeper

Feet Skills 3

- 1- Coach passes ball back to Goalkeeper.
- 2- Goalkeeper clears the ball long first time or after one or two touches.

Progression-

Forward adding pressure to the Goalkeeper.

Crossing Exercises-

High Balls 1

Set up- Small six yard goal; server standing to the side of the goal as above.

- 1- S1 to throw a high ball
- 2- GK comes to collect the high ball.

* Make sure to work high balls from both sides

High Balls 2

Set Up- Poles or Cones set up along the six yard line, one inline with both posts and the other in the middle of the goal.

- 1- S1 serves ball to near/middle/back post
- 2- Goalkeeper comes to collect high ball

* Make sure to work both sides

High Balls 3

Set Up- GK stands in Goal, with server standing out wide in 18 yard box.

- 1- GK throws ball out to S1
- 2- GK then proceeds to near post
- 3- Once GK touches near post, S1 to serve a high ball
- 4- GK collects high ball

*Make sure to work both sides

Crossing Exercises-

High Balls 4

- S1 Crosses ball in from various positions around wing areas of the 18 yard box.
- Goalkeepers come to collect the crosses and deliver a throw back to the coach.

Progression-

- Adding attackers and defenders

*Make sure to cross from both sides of the goal.

High Balls 5

1- S1 delivers a cross into the Box for Goalkeeper to collect. Once GK collects cross, throws the ball back to S1.

2- Goalkeeper will then face a shot from S2.

*Make sure to cross from both sides of the goal.

Phase of Play/Small Sided Games

POP attacking From GK

Phase of Play over 2/3 of the field. 8 attackers (red) and GK on one team playing down the field and must score on the three mini goals on the other end of the pitch. 8 defenders (yellow) playing in a 2-3-3 formation. They attempt to score on the main goal.

Start- One of the yellow midfielders misplaces a pass to long to the GK, two of the three yellow forwards run towards GK s if they are chasing the ball down.

Start 2- as above but the GK kicks or throws out to whoever is in best position (free play)

Key Factors- as GK gains possession to the ball; defense stays compact make safe the central area. Composure of the GK.

Trigger action- as soon as GK has possession the attacking team will disperse properly to create proper outlets

SSG Shot Stopping

Organization- 30 yards long by width of 6 yard box.

Small sided Game 2 v 2 plus GKs

Introduce support of defenders after distribution to aid GK.

Communication- on the ball

- off the ball
- hold him/her up
- press, cover

SSG 5 v 5

Organization-

- Field 36 yards long by 40 yards wide two big goals on each end of the playing area.

- Split teams in half (diagram shown with 5v5)

- Game is started with one GK throwing across to the other GK whom rolls it out to one of his teammates.

Progression-

- Adding bumpers on side of goals to promote more positive play.

- Adding wing players to promote flank play.

- Adding neutral to play with team in possession to have more attacks on goal.
